# Green Campus Policy

## **GREEN CAMPUS POLICY**

SVD Government Degree College for Women, Nidadavole demonstrate higher sensitivity and responsibility in implementing green concepts in the campus. The campus sustainability initiative is established with the aim of promoting green practices in and beyond the institution and develop best practices strategies in environmental management. Although establishment and maintenance of green campus is important, spreading awareness on the green practices among students and educating stake holders is our priority.

### **Water Management**

- Maintain RO Water Plant in the campus, in view of better Health of the students.
- Direct the Filtered out Water to the Soak Pits, so as to preserve the Water Levels of the Earth.

### **Waste Management**

- Spread the awareness amongst society about the waste management for ecosystem and methods for its disposal.
- Promote the efforts for the conversion of waste into renewable energy

### **Renewable Energy**

- Create awareness about renewable energy
- Adopt and promote power saving electrical equipment
- Beware on the role of scientific electrification and the use of bulbs and equipments in saving of power

### **Tobacco Free campus**

- According to institute policy and rules the use of tobacco products is treated as offence.

## **Green initiatives beyond the campus**

- The Green Campus Programs beyond the campus are encouraged and planned. Strong commitment and support from the staff and students is always there for contribution and embedding sustainability in the campus and beyond the campus. Green Neighborhood promotional programs inculcate social skills in the students and bring awareness in communities to control pollution, save energy, practice on-site renewable energy methods and preserve agricultural and environmentally sensitive areas. The student-led Green Campus programs are initiated by NSS volunteers under the NSS College Program Officer.

## **Save Energy TIPS:**

1. Activate power management features on your computer and monitor so that it will go into a low power “sleep” mode when not working on it.
2. Turn off monitor when one leaves computer table.
3. Activate power management features on laser printers.
4. Whenever possible, shut down rather than logging off.
5. Turn off unnecessary lights and use daylight instead.
6. Avoid the use of decorative lighting.
7. Use LED or compact fluorescent bulbs.
8. Keep lights off in conference rooms, classrooms, lecture halls when they are not in use.
9. Use the fans only when they are needed. Our college has to work out the time bound strategies to implement green campus initiatives for healthy ecosystems.
