

## **SVD GOVT. DEGREE COLLEGE (W)**

### **Waste management measures**

Across the carpet area of the college, there are waste storing dustbins. Since the institution is run by the government of Andhra Pradesh, the panchayathi of the town takes care of the solid waste from the college. we don't have formal MoU with the panchayats department. Every day, the panchayathi van collects solid waste stored in the dustbins and takes it to the recycling unit far away from the town. Unwanted water in the college is directed towards and connected to the panchayathi drainage system. Hence, there is no water logging on the premises.
